Required Tools: (Not included)

- Phillips Screwdriver
- 13mm Allen Wrench
- Small Pointy Object

! WARNING

! CAUTION: To avoid potential shock or other injury, turn power switch OFF and disconnect charger before conducting any assembly or maintenance procedures. Failure to follow these steps in the correct order may cause irreparable damage.

Step 1

Using a Phillips screwdriver, remove six (6) screws from the deck. Remove the deck cover and set it aside.

Step 2

Locate and disconnect the battery from the controller.

(Black Label E90; Black Label E100; Power Core E90; Power Core E90 Lightshow; Power Core XLR90; Power Core XLR100; Power Core E90 Glow; Power Core E95; Power Core E100 — See image 1.)

Power Core E195; Power Core XLR150— See image 2.)

Step 3

Using a small pointy object, depress the tabs from the prongs and remove the prongs from the connector.

Step 4

Using a 13mm Allen wrench, loosen the lock nut from the axle on the right side of the wheel.

Step 5

Using a Phillips screwdriver, remove two (2) screws that hold the rear wheel onto the frame and slide the wheel out.

Step 6

Insert a new rear wheel, then reverse steps 1 through 5.

ATTENTION: Charge battery 12 hours before using.
