⚠ WARNING. To avoid serious injury:

SAFETY PRECAUTIONS during operation and maintenance. Parents/adult supervisors read this page first.

PARENTS/SUPERVISING ADULTS MUST TEACH CHILDREN HOW TO SAFELY RIDE THIS GROUND FORCE ELITE.

If the rider fails to use common sense and heed these warnings, there is an increased risk of damage, serious injury or possibly death.

Riding this Product Presents Potential Risks.

- This electrically driven product is not a toy (Annex I of Directive 2009/48/EC). Like any four wheeled riding product, an electric Ground Force Elite can be hazardous (for example, falling off or riding into a hazardous situation). Electric Ground Force Elites are, of course, meant to move and it is therefore possible for a rider to lose control or otherwise get into dangerous situations.
- Both children and adults responsible for supervising them must recognize that if such things occur, a rider can be seriously injured or possibly die, even when using safety equipment and taking other safety precautions.

⚠ WARNING: PARENTAL AND ADULT RESPONSIBILITY AND SUPERVISION NECESSARY: This manual contains important safety information. It is your responsibility to review this information and make sure that all riders understand all warnings, cautions, instructions and safety topics, and assure that young riders are able to safely and responsibly use this product. Razor USA recommends that you periodically review and reinforce the information in this manual with younger riders, and that you inspect and maintain your children's product to ensure their safety.

⚠ WARNING: NOT FOR CHILDREN UNDER AGE 13 OR HEAVIER THAN 91 KG. Because products, like the Ground Force Elite, can and do present potential hazards plainly associated with their use, it is well recognized THE NEED FOR EXERCISE OF PARENTAL RESPONSIBILITY IN SELECTING RIDING PRODUCTS APPROPRIATE TO THE AGE OF A CHILD, OR PARENTAL SUPERVISION IN SITUATIONS IN WHICH CHILDREN OF VARIOUS AGES MAY HAVE ACCESS TO THE SAME RIDING PRODUCTS, IS IMPORTANT. Not every product is appropriate for every age or size of child, and different age recommendations are found within this category of product which are intended to reflect the nature of the hazards and the expected mental or physical ability, or both, of a rider to cope with the hazards.

- **Razor recommends that children under the age of 13 not be permitted to use the Ground Force Elite. This recommendation is based not just on age or weight or height – it reflects consideration of expected maturity and skills as well as physical size. The recommended rider age of 13 years or older is only an estimate and can be affected by the rider's size, weight or skills – not every child 13 years old will be suited to the product. Certainly, any rider unable to fit comfortably on the Ground Force Elite should not attempt to ride it, but parent's decision to allow his or her child to ride this product should be based on the child's maturity, skill, and ability to follow rules. Razor emphasizes that adults are strongly advised not to choose to disregard Razor's recommendations or permit younger children to ride the Ground Force Elite.**
- **DO NOT EXCEED THE WEIGHT LIMIT OF 91 kg.** Rider weight alone also does not necessarily mean a person's size is appropriate to fit or maintain control of the Ground Force Elite. Keep this product away from small children and remember that this product is intended for use only by persons who are, at a minimum, completely comfortable and competent while operating the product.
- **Persons with any mental or physical conditions that may make them susceptible to injury, impair their physical dexterity or mental capabilities to recognize, understand, and follow safety instructions and to be able to understand the hazards inherent in Ground Force Elite use, should not use or be permitted to use products inappropriate for their abilities. Persons with heart conditions, head, back or neck ailments (or prior surgeries to these areas of the body), or pregnant women, should be cautioned not to operate such products.**

Proper Riding Equipment, Clothes, Shoes

- Always wear proper protective equipment, such as an approved safety helmet (with chin strap securely buckled), elbow pads and kneepads. A helmet may be legally required by local law or regulation in your area. In addition, a long-sleeved shirt, long pants, and gloves are recommended.
- Always wear athletic shoes (lace-up shoes with rubber soles), never ride barefoot or in sandals, and keep shoelaces tied and away from the wheels, motor and drive system.

Check Ground Force Elite Before Use – Maintain After Use

- Check brake for proper function. When you push on the brake with your foot, brake should provide positive braking action.
- After use, maintain and repair your Ground Force Elite in accordance with the manufacturer's specifications in this manual. Use only the manufacturer's authorized replacement parts. Do not modify this Ground Force Elite from the manufacturer's original design and configuration.
- Acceptable Riding Practices and Conditions – Parents/adults should discuss these rules with their children.
- Protective equipment should be worn. Not to be used in traffic.

Where to Ride the Ground Force Elite

- Always check and obey any local laws or regulations which may affect the locations where the electric Ground Force Elite may be used. Keep safely away from autos and motor vehicle traffic at all times and only use where allowed and with caution.
- The Ground Force Elite is meant to be used on private property and on closed courses and not on public streets or sidewalks. Do not ride your electric four wheeler in any areas where pedestrian or vehicle traffic are present.
- Ride defensively. Be careful to avoid pedestrians, skaters, skateboards, bikes, children or animals who may enter your path. Respect the rights and property of others.
- Wet, slick, bumpy, uneven or rough surfaces may lessen traction and increase the risk of accidents.
- Do not ride your Ground Force Elite in mud, ice, puddles or water.
- Avoid sharp bumps, drainage grates, and sudden surface changes.
- Do not touch the brakes or motor on your Ground Force Elite when in use or immediately after riding as these parts can become very hot.
- Do not ride your Ground Force Elite in wet or icy weather and never immerse the Ground Force Elite in water, as the electrical and drive components could be damaged by water or create other possibly unsafe conditions.
- Never risk damaging surfaces such as carpet or flooring by use of an electric Ground Force Elite indoors.
- Never use near steps or swimming pools.

How to Ride the Ground Force Elite

- Do not turn the power switch in the Ground Force Elite to **ON** or depress/activate the accelerator pedal unless you are seated and in a safe, outdoor environment suitable for riding. Always turn the power switch to **OFF** before exiting the Ground Force Elite.
- Maintain a hold on the steering wheel at all times.
- Do not touch the brakes or motor on your Ground Force Elite when in use or immediately after riding as these parts can become very hot.
- Avoid high speeds, as you might have on downhill rides, where you might lose control.
- Do not ride at night or when visibility is limited.
- Do not attempt or do stunts or tricks on your electric Ground Force Elite. The Ground Force Elite is not strong enough to withstand misuse and abuse such as jumping, curb grinding or any other type of stunts. Racing, stunt riding, or other maneuvers also increase the risk of loss of control, or may cause uncontrolled rider actions or reactions. All of these could result in serious injury or possibly death.
- Never allow more than one person at a time ride the Ground Force Elite.
- Do not allow hands, feet, hair, body parts, clothing, or similar articles to come in contact with moving parts or wheels.
- Never use headphones or a cell phone to talk or text when riding.
- Never hitch a ride with a vehicle.

Model	Voltage (Nominal) Vdc	Capacity (Nominal) Ah	Charge Temperature Range	Operating Temperature Range
Ground Force Elite	36	5	0° to 40°C 32° to 104°F	-20° to 40°C -4° to 122°F

Using the Charger

- Never modify the electric system. Alteration could cause a fire. Use of the wrong type of battery or charger could cause an explosion.
- **BEFORE EACH USE:** Charge the battery for AT LEAST 12 hours.
- Turn off after each ride. The battery may be unable to recharge if left "ON" without use.
- Do NOT store in freezing or below freezing temperatures! Freezing temperatures will permanently damage the battery.
- The charger supplied with the electric Ground Force Elite should be regularly examined for damage to the cord, plug, enclosure and other parts. In the event of such damage, the Ground Force Elite must not be charged until the charger has been repaired or replaced.
- Use only a charger recommended by Razor.
- The charger is not a toy. Charger should only be operated by an adult.
- Do not operate charger near flammable materials or an open flame.
- Unplug charger and disconnect from Ground Force Elite when not in use.
- Do not exceed charging time.
- Always disconnect Ground Force Elite from charger prior to wiping it down or cleaning with a damp cloth.

**CONTAINS SEALED NON-SPILLABLE LEAD-ACID BATTERIES.
BATTERIES MUST BE RECYCLED.**

⚠ ADVERTENCIA. Para evitar lesiones graves:**PRECAUCIONES DE SEGURIDAD durante el uso y el mantenimiento. Padres/supervisores adultos, lean esta hoja primero.****LOS PADRES/ADULTOS SUPERVISORES DEBERÁN ENSEÑAR A LOS NIÑOS CÓMO CONDUCIR ESTE GROUND FORCE ELITE DE MANERA SEGURA. Si el conductor no sigue el sentido común y no tiene presente estas advertencias, hay mayor riesgo de daños, lesiones graves o incluso la muerte.****Conducir un Ground Force Elite eléctrico entraña algunos riesgos potenciales.**

- Este producto eléctrico no es un juguete (Anexo I de la Directiva 2009/48/EC). Como cualquier otro producto eléctrico de conducción de cuatro ruedas, un Ground Force Elite eléctrico puede resultar peligroso (por ejemplo, pueden producirse caídas o generarse situaciones peligrosas). Los Ground Force Elite eléctricos han sido diseñados, por supuesto, para desplazarse y, por lo tanto, es posible que el conductor pierda el control o que se vea implicado en otras situaciones peligrosas.
- Tanto los niños como los adultos responsables de su supervisión deben entender que si se diera alguna de las anteriores situaciones, el conductor puede resultar gravemente herido o incluso morir, aunque se haya hecho uso del equipo de seguridad y se hayan tomado otras medidas de seguridad.

⚠ ADVERTENCIA: SE REQUIERE LA SUPERVISIÓN Y RESPONSABILIDAD DE PADRES O ADULTOS: Este manual contiene importante información sobre seguridad. Es su responsabilidad examinar esta información y asegurarse de que todos los usuarios entiendan todas las advertencias, precauciones, instrucciones y pautas sobre seguridad, así como garantizar que los conductores jóvenes sean capaces de usar este producto de forma segura y responsable. Razor USA le recomienda releer y reforzar periódicamente la información de este manual con los conductores más jóvenes y realizar la inspección y mantenimiento del producto de sus niños, a fin de garantizar su seguridad.

⚠ ADVERTENCIA: NO INDICADO PARA NIÑOS MENORES DE 13 AÑOS O QUE PESEN MENOS DE 91 KG. Debido a que los productos como el Ground Force Elite pueden presentar, y de hecho presentan, peligros potenciales directamente relacionados con su uso, ES IMPORTANTE EL EJERCICIO DE LA RESPONSABILIDAD PARENTAL A LA HORA DE SELECCIONAR LOS PRODUCTOS DE CONDUCCIÓN APROPIADOS SEGÚN LA EDAD DEL NIÑO, O LA SUPERVISIÓN DE LOS PADRES EN SITUACIONES EN LAS QUE NIÑOS DE DIFERENTES EDADES PUEDAN TENER ACCESO A LOS MISMOS PRODUCTOS DE CONDUCCIÓN. Dado que no todos los productos son apropiados para todas las edades ni tamaños de conductores, se han fijado diferentes recomendaciones de edad en esta categoría de producto, que pretenden reflejar el tipo de peligros y la capacidad física o mental esperadas, o ambas, de un conductor para poder hacer frente a posibles peligros.

- **Razor recomienda no permitir el uso del Ground Force Elite a niños menores de 13 años.** Esta recomendación se fundamenta, no sólo en la edad, el peso o la altura, sino también en el nivel de madurez y habilidad esperables para la edad, además del tamaño físico del conductor. La edad recomendada de 13 años del conductor es sólo una estimación, pudiendo variar según el tamaño, el peso y la habilidad del conductor – no todos los niños de 13 años estarán capacitados para utilizar este producto. En cualquier caso, un conductor que no se sienta cómodo en el Ground Force Elite no debería tratar de conducirlo; no obstante, la decisión de los padres de permitir que su hijo/a conduzca este producto debe basarse en el nivel de madurez, habilidad y capacidad de cumplir las normas del conductor. Razor insiste encarecidamente en que los adultos no desoigan las recomendaciones de Razor y no permitan a niños más pequeños conducir el Ground Force Elite.
- **EL PESO DEL CONDUCTOR NO DEBE EXCEDER EL LÍMITE DE 91 kg.** El peso del conductor no necesariamente significa que el tamaño de la persona sea apropiado para estar cómodo o mantener el control del Ground Force Elite. Mantenga este producto alejado de los niños pequeños y recuerde que está previsto solo para ser usado por personas que, como mínimo, pueden manejar el producto de forma totalmente cómoda y competente.
- **Aquellas personas cuyas condiciones psíquicas o físicas puedan hacerlas susceptibles de sufrir daños, o ver sus habilidades físicas o capacidades mentales afectadas a la hora de reconocer, comprender y seguir las instrucciones de seguridad y ser capaces de entender los riesgos inherentes a la utilización del Ground Force Elite no deberían utilizar o no se les debería permitir utilizar productos inapropiados.** Las personas con problemas de corazón, cabeza, espalda o cuello (o que hayan sido sometidas a cirugías de estas áreas corporales), o mujeres embarazadas, deberán ser advertidas de no usar este tipo de productos.

Equipamiento, ropa y calzado adecuado para conducir

- Lleve siempre equipo de protección adecuado, como casco de seguridad homologado (con el barboquejo bien abrochado), coderas y rodilleras. Es posible que las leyes o reglamentaciones locales de su área exijan el uso de casco. Se aconseja llevar una camiseta de manga larga, pantalones largos y guantes.
- Llevar siempre calzado deportivo (zapatos con cordones y suela de goma); no conducir nunca descalzo ni con sandalias y tener siempre los cordones atados y alejados de las ruedas, del motor y del sistema de tracción.

Comprobación del Ground Force Elite antes del uso – Mantenimiento después del uso

- Verifique el correcto funcionamiento del freno. Cuando empuje el freno con su pie, el freno debe brindar una acción de frenado positivo.
- Después del uso, realice el mantenimiento y repare el Ground Force Elite de acuerdo con las especificaciones del fabricante que se describen este manual. Utilice únicamente piezas de repuesto autorizadas por el fabricante. No modifique este Ground Force Elite, manténgalo de acuerdo con el diseño y configuración originales del fabricante.
- Prácticas y condiciones aceptables para la conducción – Los padres/adultos deberán comentar estas reglas con los niños.
- Se recomienda utilizar equipo de protección. No debe utilizarse en medio del tráfico.
